REGULAR COMMISSION MEETING AGENDA Thursday, April 21, 2022 6:00 p.m.

IN AN EFFORT TO PROTECT THE PUBLIC AND THE DISTRICT BOARD, A CONFERENCE LINE HAS BEEN SET UP TO ACCOMMODATE COMMUNITY ACCESS TO THE MEETING.

CONFERENCE LINE: 1-917-900-1022 CONFERENCE ID: 18820

THIS IS NOT A TOLL-FREE NUMBER AND YOU MAY BE SUBJECT TO LONG DISTANCE CHARGES, ACCORDING TO YOUR LONG DISTANCE PLAN

When the Chairperson opens the meeting for public comment, please follow these instructions: If you wish to speak please dial *5. The moderator will unmute your line when it is your turn to speak, and notify you by announcing the last 4 digits of your telephone number. Please announce your name and address. You will be allowed to speak for 3 minutes.

- 1. Meeting called to order and a quorum established
- 2. Prayer and the Pledge of Allegiance to the Flag
- 3. Welcome guests and open floor for comments for non-agendaed items
- 4. Update on Water Improvements Project
- 5. Approval of Minutes from March 24, 2021 Board Meeting
- 6. Staff Reports
 - a. Director's Report March 2022 Kristi Hathcock
 - b. Water Audit March 2022 Kristi Hathcock
 - c. Financial Report March 2022 Lynette Senter
 - d. Other District Manager Items Lynette Senter
- 7. New Business
 - a. Draft Impact Fee Study
 - b. Employee Reviews
- Old Business
 - a. Co-Bank Refinancing
 - b Neighborhood Meter Project Update
 - c. Asset Management for Water and Wastewater
 - d. County Ordinance 2005-3, Change Regarding Number of Board Members
- Closing Remarks Commissioners/Staff
- 10. Motion to Adjourn

MINUTES OF REGULAR COMMISSION MEETING

March 24, 2022

1. The meeting was held at the District Building at 6:00 PM on March 24, 2022. Present were Commissioners Michael Hunter, Randy Hathcock, Thomas Kicklighter, Gayle Lundy, Michael Lynn, and Board Attorney J.D. Durant. TCWSD Staff present were Kristi Hathcock and Lynette Senter.

The meeting was called to order at 6:00 p.m.

2. Election of Chairman – Commissioner Hathcock made a motion that Vice Chairman Hunter serve as Chairman. Commissioner Lundy offered a second. Vice Chairman Hunter asked for further discussion. By unanimous vote, the motion was approved.

Election of Vice Chairman - Commissioner Lynn made a motion that Commissioner Hathcock serve as Vice Chairman. Commissioner Kicklighter offered a second. Chairman Hunter asked for further discussion. By unanimous vote, the motion was approved.

- 3. Vice Chairman Hathcock led in prayer and the pledge of allegiance to the flag.
- 4. There were three guests, Roger Weste, Willi Huxford and Glenn Senter. There were no comments from the public for non-agendaed items.
- 5. Update on the Water Improvements Project Mr. Menadier from Dewberry was unable to attend via phone and will give an update at the April meeting.
- 6. Approval of minutes from the February 17, 2022, Board Meeting and the March 3, 2022, Special Meeting. Chairman Hunter asked if everyone had reviewed the minutes and if there was a motion to approve. Vice Chairman Hathcock made a motion to accept the minutes from the February 17, 2022, Board Meeting and the March 3, 2022, Special Meeting. Commissioner Kicklighter offered a second. Chairman Hunter asked for further discussion. By unanimous vote, the motion was approved.

7. Staff and Committee Reports

- a. **Directors Report Kristi Hathcock –** Ms. Hathcock reported the Water and Sewer sales for the month of February 2022 totaled \$67,049.51, \$6,168.19 above the budgeted estimate of \$60,881.32. There was one past due customer and we have made arrangements with the family to get their account caught up. There were no turned off accounts. There were three changes in memberships. There were twenty-two adjustments totaling \$322.19.
- b. **Water Audits Kristi Hathcock -** Ms. Hathcock reported the water audit for February 2022 showed an estimated water loss of 22.28%. The field staff found a damaged valve on Spoonbill Road and are continuing to look for more leaks. The Neighborhood Meters will help us narrow down other areas.

TAYLOR COASTAL WATER & SEWER DISTRICT MINUTES OF REGULAR COMMISSION MEETING Page 2 of 4

c. **Financial Reports – Lynette Senter**– Ms. Senter reported the sales including new memberships for the month of February 2022 were \$67,049.51, \$6,168.19 above our budgeted amount of \$60,881.33. Exception expenses \$805.13 for Computer Services, \$619.66 for Fuel, \$254.52 for Tractor Expenses, \$7567.25 for Repair/Maintenance at the Wastewater Plant, \$1,135.07 for Replacement Parts for Sewer, and \$31,309.80 for the Neighborhood Meter Expenses. We received \$43.07 in interest income. Total Net Income for February was -\$8,261.35.

d. Other Office Manager Items - Lynette Senter

- Boat Ramp Lift Station Pump Last month, we asked Smith Electric Motors to pick up the pump and give us a repair estimate. We have now gotten an estimate of \$11,201.96 to repair/rehab the pump. We also got a quote for a new pump of \$24,974.55. There was discussion regarding repair versus replacement. Ms. Senter explained that she discussed this with Mr. Bennett as well as the repair company, and they both agreed that repair would be the best choice as no modifications would be needed and this pump will become the backup pump in case of emergency. Vice Chairman Hathcock made a motion to have the boat ramp lift station pump repaired. Commissioner Kicklighter offered a second. Chairman Hunter asked for further discussion. By unanimous vote, the motion was approved.
- 2) <u>Lundy Repairs</u> The repairs have been made to the contractor error at Henry and Gayle Lundy's property. Ms. Senter explained that as we do not stock the appropriate plumbing parts and pipe Mr. Bennett has asked that if we discover another error like this, we contract the work out to a plumbing contractor due to the complexities and amount of digging that had to be done.
- 3) <u>18835 Beach Road</u> Ms. Senter advised the Board that a portion of the parcel located across the street from the District Office and Water Plant has applied for a change in designation from Agriculture to Water Oriented Commercial.
- 4) <u>Updated Equipment To Do List</u> At the meeting on February 17, 2022, Commissioner Lynn asked for an update on the District's equipment/assets in need of repair or replacement. Ms. Senter explained that the past month has been really busy, but she and Mr. Bennett have been working on both the water and sewer lists and will have them updated and ready for the Board to review at the April meeting.
- 5) <u>Employee Reviews</u> Ms. Senter explained that she will be scheduling employee reviews during the month of April. Ms. Senter also told the Board that she will be emailing each Board Member a form so they can review her position as well.

New Business

a. Reported Sewage Leak at Osprey Circle – Ms. Senter provided the Board with background information, a history of line usage, and the repair process that followed. She explained that the adjacent property owners would be notified if there was a sewer leak in the future and

TAYLOR COASTAL WATER & SEWER DISTRICT MINUTES OF REGULAR COMMISSION MEETING Page 3 of 4

that the District has two Sewer Work signs available for future use.

- b. County Ordinance Change to Reduce the Number of Board Members Ms. Senter provided a copy of the Taylor County Ordinance 2005-03 Section 66-145 that sets the number of Board Members. Ms. Senter explained that in the past, it has been exceedingly difficult to keep a full board, and to ensure a quorum at each meeting. This reduction in numbers was also discussed by previous boards, but no action was taken. Ms. Senter also informed the Board that the original number was set at 7 to try and have a member of each beach area on the Board, but that was never accomplished. There was discussion regarding the ability to increase this number again if it is needed in the future. Vice Chairman Hathcock made a motion that Ms. Senter prepare a request to the Taylor County Commission asking that the ordinance be changed from seven members to five. Commissioner Lundy offered a second. Chairman Hunter asked for further discussion. By unanimous vote, the motion was approved.
- c. County Ordinance Change to Require Board Members Have an Active District Account

 Ms. Senter explained that currently, the only requirements to be on the TCWSD Board are
 1) Own property within the District, and 2) Be a registered voter within the State of Florida.

 There was discussion by the Board and members of the audience regarding the pros and cons.

 The Board then agreed to table this discussion for a later date.

Old Business

- a. <u>Consideration of Mr. VanBlargan's Request for Refund</u> Ms. Senter provided a response to Mr. VanBlargan's Concerns in the Board package. The board reviewed the information. Vice Chairman Hathcock made a motion to accept the Staff recommendation that a refund should not be provided. Commissioner Kicklighter offered a second. Chairman Hunter asked for further discussion. By unanimous vote, the motion was approved.
- b. <u>Co-Bank Refinancing</u> Mr. Durant is working to obtain the opinion from the bond attorney so that we can proceed with the closing on the loan. He explained to the Board that the cost of the letter would be \$10,000.00. Ms. Senter provided the previous costs for bond attorneys for Phase I which was \$13,392.82 and Phase II which was \$19,547.88. Commissioner Kicklighter made a motion to approve the expenditure of \$10,000.00 for the Bond Attorney Opinion. Commissioner Lynn offered a second. Chairman Hunter asked for further discussion. By unanimous vote, the motion was approved.

Mr. Durant then explained that in order to proceed with the closing, the Board would need to adopt a Resolution approving the refinancing, and that the Chairman and Vice Chairman would need to sign it. Vice Chairman Hathcock made a motion to adopt the resolution approving the refinancing of the District's USDA-RD Loans. Commissioner Lynn offered a second. Chairman Hunter asked for further discussion. By unanimous vote, the motion was approved.

c. <u>Neighborhood Meter Project</u> – Ms. Senter explained that all four neighborhood meters have been installed and she was in the process of making the request for reimbursement to

TAYLOR COASTAL WATER & SEWER DISTRICT MINUTES OF REGULAR COMMISSION MEETING Page 4 of 4

Suwanee River Water Management District. We have been notified by Taylor County Engineer, Mr. Kenneth Dudley, that two of the neighborhood meters will require an upgraded lid and hatch system due to their proximity to the County road. Ms. Senter has contacted the supplier and ordered the upgraded lids and hatches. Once we receive the invoice for the new lids and hatches, we will finish the request for reimbursement. The total funds expended are \$101,582.25. Our grant from SRWMD was for \$100,000.00 and the District will make up the remainder.

- d. <u>Impact Fee Study</u> The engineer performing the Impact Fee Study has indicated that she is making great progress and should have a draft study ready for review at our April Board meeting.
- 10. **Closing Remarks Commissioners/Staff** Commissioner Kicklighter asked Ms. Senter to ask the Board for help with anything, including future projects. Ms. Senter asked Chairman Hunter and Vice Chairman Hathcock to stop by Capital City Bank to sign new signature cards.

11. Motion to Adjourn

Chairman Hunter requested a Motion to Adjourn. Vice Chairman Hathcock made a motion to adjourn the meeting. Commissioner Kicklighter offered a second. The meeting adjourned at 6:57 PM.

Board Actions:

- 1. The Board approved the election of Chairman Mike Hunter.
- 2. The Board approved the election of Vice Chairman Randy Hathcock.
- 3. The Board approved the minutes from the February 17, 2022, and March 3, 2022, Special Board Meeting.
- 4. The Board approved the quote for repairing the boat ramp lift station pump.
- 5. The Board approved the request for a change in the County's Ordinance 2005-03, reducing the TCWSD Board from seven members to five members.
- 6. The Board approved the recommendation that a refund should not be provided to Richard VanBlargan.
- 7. The Board approved a motion to pay \$10,000.00 for the Bond Attorney's opinion.
- 8. The Board approved a resolution approving the refinancing of the District's USDA-RD Loans.
- BY: Lynette Taylor Senter, Board Secretary Taylor Coastal Water and Sewer District

RE: Water & Wastewater Impact Fee Study
Taylor Coastal W&S District, Taylor Co., PWS: 2624165, Facility ID: FLA325864

Dear Ms. Senter:

Florida Rural Water Association is pleased to provide this Impact Fee Study and recommendations to Taylor Coastal Water and Sewer District as a membership benefit. FRWA is dedicated to assisting water and wastewater systems to provide Floridians with an ample affordable supply of high quality water and wastewater services, while protecting natural systems.

You should be congratulated for your water and wastewater system and operations staff. With unfunded mandates continuing to roll down from state and federal governments along with the aging of pipes, pumps and plants, you have risen to the challenge and continue to operate the system providing safe drinking water and consistent sewer services. To make a very difficult job more difficult, revenues have lagged behind expenses. Utility operators have done more with less each year, as measured in real dollars. They have shouldered the responsibility of running the system in a responsible manner and in compliance with state rules and regulations.

Impact Fees. Impact Fees (Connection Charges) are one-time charges assessed to the new development or connections to reimburse utility systems for current and proposed infrastructure required to supply water, collect, treat, and dispose of wastewater. Impact Fees are proportional to the capacity set aside for the new customer, development, or connection. In some systems these charges are sometimes called Capacity Fees while others may be called Benefit Assessments, User Fees, Contributions In Aid of Construction (CIAC) or Connection Charges. ¹

¹ AWWA, *Manual M1 - Principles of Water Rates, Fees and Charges*, 5th Edition, American Water Works Association, Denver CO., 2012, pp. 181-187

Executive Summary.

Findings & Recommendations.

Taylor Coastal Water and Sewer District has two options for setting Impact Fees:

Option A – Use the Remaining Useful Life Basis to capture the existing cost of running the District Water and Wastewater Utility.

Option B – Use the Replacement Value Basis to capture the true and sustainable cost of running the District Water and Wastewater Utility.

1. Water Impact Fee Finding.

Taylor Coastal Water and Sewer District currently charges a Water Connection Fee of \$1,000 to pay for cost of equipment, installation, and site visits for the new service. The Impact Fee would be a separate charge from the Water Connection Fee, paying a pro rata share of the reasonably anticipated costs of capital expansion of the water utilities for the addition of the new service. The District has the option of using the evaluated Fee of \$890 per ERC using the Remaining Useful Life Basis —or- \$4,930 per ERC using the Replacement Value Basis to capture the true and sustainable cost of running its Water Utility. FRWA recommends using the Replacement Value.

2. Wastewater Impact Fee Findings.

The District currently charges a Grinder Pump Installation Fee of \$6,000 for new services requiring a grinder pump station. This fee pays for the cost of the equipment, installation and site visits needed for providing the grinder pump at the new service location. The Impact Fee would be a separate charge, paying a pro rata share of the reasonably anticipated costs of capital expansion of the wastewater utilities for the addition of the new service. The District has the option of using the evaluated Fee of \$1,770 per ERC using the Remaining Useful Life Basis —or-\$3,320 per ERC using the Replacement Value Basis to capture the true and sustainable cost of running its Water Utility. FRWA recommends using the Replacement Value.

3. Water & Wastewater Impact Fee Findings.

In combination both the Water and Wastewater Impact Fees are:

Equivalent Residential Water & Wastewater Connection (ERC) Calculation Comparison

Category	Current Impact Fees	Option A Current Value	Option B Replacement Value
Water	\$0	\$890/ ERC	\$4,930/ ERC
Wastewater	\$0	\$1,770/ ERC	\$3,320/ ERC
Totals	\$0	\$2,660 / ERC	\$8,250/ ERC

4. Water and Wastewater Impact Fee Recommendations.

FRWA recommends that the District use the evaluated fees to capture the true and sustainable cost of running its Water and Wastewater Utility and to maintain and protect the District's vital infrastructure. We

recommend and can assist with establishing a 5 and 10-year Capital Improvement Program to keep the District's utility financially sound.

5. Other Impact Fee Recommendations

- Fees for turn-ons, turn-offs, and late fees might need to be increased for inflation. Fees should be reviewed / updated at least annually by staff based on actual time and material costs for meters, fittings, boxes, equipment costs, fuel costs, and salaries
- The Utility's policies on payments, late charge fees, illegal turn on penalty, or returned check penalty should also be reviewed / updated at least annually by staff.
- FRWA recommends implementing annual adjustments in accordance with the Florida Public Service Commission. The Florida Public Service Commission current Price Index is found at http://www.psc.state.fl.us/utilities/waterwastewater/, click on "Price Index and Pass Through Application for Water and Wastewater Utilities".

Year	Commission Approved Index	Year	Commission Approved Index
2010	0.56%	2016	1.29%
2011	1.18%	2017	1.51%
2012	2.41%	2018	1.76%
2013	1.63%	2019	2.36%
2014	1.41%	2020	1.79%
2015	1.57%	2021	1.17%

It is recommended that you revisit this Impact Fee study every 3 to 5 years or as needed. Indicators of need include changes to revenue or CIP expense predictions, current financial position and, other indicators during the annual budget approval process. In addition, construction and implementation of major capital infrastructure improvements, such as the planned Potable Water Well and Ground Storage Tank improvements, will warrant updating the Impact Fees.

Impact Fee Evaluation

Impact Fee Study Standards.

FRWA uses contemporary industry standards for recommending and establishing utility Impact Fees, these include: American Water Works Association (AWWA) Manuals of Practice, Generally Accepted Accounting Principles (GAAP), Governmental Accounting Standards Board (GASB), and Florida Public Service Commission guidelines.

Impact Fee Calculations.

Impact Fee Calculations are performed in accordance with the American Water Works Association *Manual M1* - *Principles of Water Rates, Fees and Charges* guidelines for calculating and allocating Impact Fees to new customers.² FRWA uses a rational and conservative approach when performing these evaluations. This approach is transparent, defendable, and complies with statute and case law. Since there is a rational nexus of allocating Impact Fees to customer groups it also follows the intent of the Florida Statutes that set the basis for rates and impact fees by counties and municipalities. Such fees shall be just and equitable.³

Impact Fees are evaluated and set using the following criteria:

- The water / wastewater system has the legal authority to charge Impact Fees.
- Costs are allocated to specific customer classes based on use of the water / wastewater system infrastructure.
- New customers add incremental capital costs to the utility and the fees are set to recapture their impacts to the system.
- The evaluation of system data is sufficient to reasonably estimate the value of water / wastewater system infrastructure and support charges to new customers. The evaluation includes water / wastewater consumption, historical flow trends, growth, and inventories of water lines, wells, treatment, collection, manholes, lift stations, and etc.
- Justification of capital costs are clearly provided in the calculation of fees.
- Affordability is taken into consideration for all classes of customers and particularly to economically disadvantaged customers.
- The capital costs / fee requirements for new customers are consistent, predictable, and uniform.
- Each customer class equitably pays its own way. No undue burden is placed on one class over another customer class.

Cost Savings.

Impact Fees consultants charge anywhere from \$15,000 to \$30,000 for this type of report, and by using FRWA you have been prudent with ratepayer money. Consultant reports are much thicker in part to justify the fees, explain the results, and build a case for additional services, which means more consulting fees.

Accuracy of Revenue Predictions.

We have performed our analyses using the data and information obtained; we have relied upon such information to be accurate. Projected Impact Fee revenue precision is limited by the accuracy of the financial information provided – good information "in" equals good information "out", and vice versa. Should you find that these recommended Impact Fees are not in-line with your needs, please let us know ASAP. We will work with you to

² AWWA, *Manual M1 - Principles of Water Rates, Fees and Charges*, 6th Edition, American Water Works Association, Denver CO., 2012, pp. 181-187

³ See Florida Statutes Chapter 153 for County Water & Sewer Systems and Chapter 180 - Municipal Public Works.

carefully review and update financial records, revisit our calculations, valuation parameters, assumptions, etc. We are always happy to return, revisit your Impact Fees, and adjust the analyses as necessary, please call me anytime.

The original mission for creation and ownership of public water and wastewater utilities includes many compelling objectives: (1) health and safety of citizens; (2) protect most vulnerable residents (aged, young, poor health, economically disadvantaged, etc.); (3) the ability to return the profit ordinarily collected by a private entity to the customer in the form of lower Impact Fees; (4) provide fire protection; (5) a tool to expand the tax base; (6) the ability to shape, facilitate or control growth; and (7) promote home rule and self-determination.

Growth should pay for Growth.

New development causes the need for expansion and should therefore pay its fair share for the costs incurred. These connections are plant expansions and water / sewer line extensions -- requiring significant cost. Existing ratepayers have supported and maintained the existing facilities, and so new customers should support any new, additional or expanded facilities plus pipelines.

Some officials and new customers have argued incorrectly that the utility should allow new customers on the system without charge or at original plant costs (not adjusted for inflation). It's not fair to existing ratepayers and it is not a prudent utility practice. Nor would it be good business practice. Public officials may be tempted at times to trim budgets; lower utility rates below operational costs; and keep Impact Fees below actual capital investment needs — but this seriously reduces utilities' ability to perform its central mission, shortchanges ratepayers by delaying costs, sets up unrealistic expectations, and undermines the future vitality of the community.

Dealing with Growth & Infrastructure Decay.

Florida law requires communities to maintain adequate levels of service for public facilities and to anticipate and prepare for growth.⁴ In addition to keeping pace with growth, water and wastewater utilities must maintain the infrastructure in good operating condition. This requires adequate funding and continual repair and replacement (R&R) just to keep up with normal usage and aging. Proper management, training and hiring practices are also essential for efficient utility operation.⁵

As new customers come online more and more of the treatment capacity is used up until the plant is at capacity and must be expanded. Further, the Florida Department of Environmental Protection requires that when a water plant reaches 75% of capacity that planning for expansion must start (Rule 62-555.348 F.A.C.). Additionally, FDEP Rule 62-555.350 F.A.C. requires that suppliers of water operate and maintain their public water systems so as to comply with applicable standards, in good condition, and under the plant's permitted operating capacity. Similarly, for wastewater treatment plants, FAC 62-600.405 requires timely planning, design, and construction of needed wastewater treatment facility expansion. This requirement includes a statement signed and sealed by a professional engineer that planning and preliminary design of the necessary expansion has been initiated if the Capacity Analysis Report documents that the permitted capacity of the facility will be exceeded within the next five years.

FRWA Impact Fee Study

⁴ Florida's Community Planning Act 2021 Florida Statute 163.3161(4) - requiring local government will facilitate the adequate and efficient provision of transportation, water, sewerage, schools, parks, recreational facilities, housing, and other requirements and services.

Water Demand History per MORs

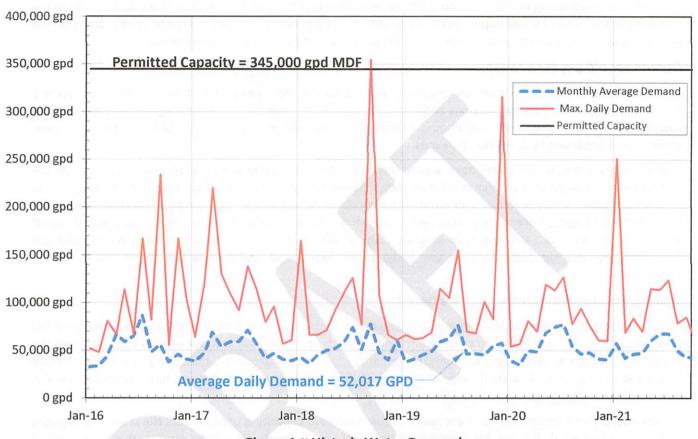

Figure 1 ~ Historic Water Demands

(gpd denotes gallons per day)

The amount of water used by the customers on the system is provided below, see Figure 1 for flow records:

1,242	Estimated Population Served
557	Equivalent Residential Connections (ERC)
51,682 gpd	Average Daily Demand (ADD) per MORs (Jan 2020 – Dec 2021)
127,000 gpd	Maximum Daily Demand (MDD) per MORs (Jan 2020 – Dec 2021, exc. Jan 2021)
345,000 gpd	Permitted Plant Capacity
37%	Percentage of water treatment plant used
228 gpd	Water used per Equivalent Residential Connection (MDD / ERC)

Raw water is provided to the District from groundwater wells. There are three wells, 4-inch, 6-inch and 8-inch with submersible pumps; however, the only well consistently used is the 8-inch well because of pressure concerns with the 4-inch well and frequent iron bacteria in the 6-inch well. The Water Treatment Plant, built in the early

1990s, provides hypo-chlorination and corrosion control and has a 10,000 gallon hydro-pneumatic tank. In addition, a booster pump station, off Steinhatchee Road, south of the Water Treatment Plant, has a 5,000 gallon storage tank, a 5,000 gallon hydro-pneumatic tank and two high service pumps. The District is currently applying for funding for construction of a new supply well at the existing Water Treatment Plant site as well as a 100,000 gallon ground storage tank and booster station, together with associated buildings, generators, and chemical feed systems.

Within the past 24 months the maximum day water treatment demand has not exceeded 75% of the plant capacity. The maximum day demand of 251,000 gpd in January 2021 was uncharacteristically high for the system and could be considered an anomaly. The average maximum day demand for January 2020 through December 2021 was 90,833 gpd and is more representative of expected system demands. This maximum day demand provides a factor of 163 gpd/ERC for current water use.

Existing Wastewater System Demand

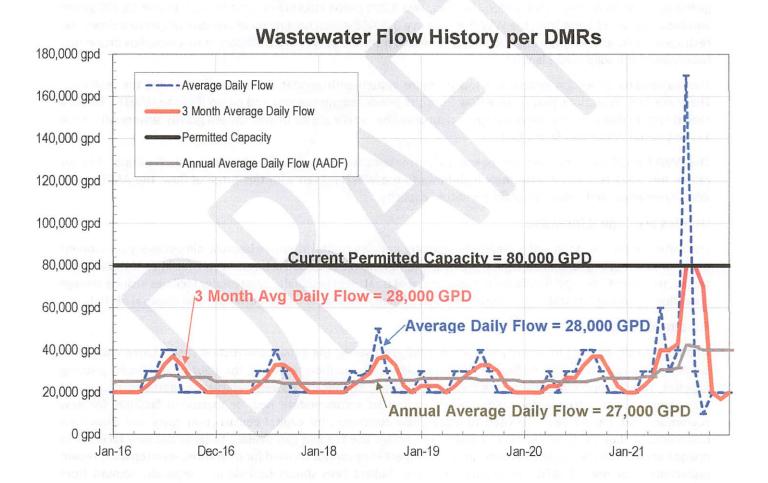

Figure 2 ~ Historic Wastewater Flows

(gpd denotes gallons per day)

The amount of wastewater used by the customers on the system is provided below; see Figure 2 for flow records:

Estimated Population Served	1,180
Equivalent Residential Connections	533
Annual Average Daily Flow per DMRs (Jan 2020 – Dec 2021)	33,000 gpd
Maximum Three Month Average Daily Flow per DMRs (Jan 2020 – Dec 2021)	33,000 gpd
Permitted Plant Capacity (Annual Average Day Demand)	80,000 gpd
Percentage of wastewater treatment plant used	41%

The District currently has a domestic WWTF with a Modified Ludzack-Ettinger biological nutrient removal process operating as extended aeration. with an AADF permitted capacity of 80,000 gpd. The WWTF consists of an influent bar screen, one 26,000 gallon flow equalization tank, one 20,000 gallon anoxic chamber, one 70,000 gallon aeration basin, two 9,866 gallon clarifiers, two 3,200 gallon chlorine contact tanks, and one 15,000 gallon aerobic digester. Effluent from the WWTF is held in a 329,000 gallon holding pond and discharged to a slow-rate, restricted public access spray irrigation field. Biosolids from the WWTF are transported to a biosolids processing facility and /or a solid waste landfill.

The wastewater collection system is a low pressure system with grinder pump stations serving the residents. There are two lift stations that receive flow from the grinder pump stations and pump it to the WWTF. This is a sealed system that utilizes grinder pumps and force mains. There are no District owned gravity sewers within the Taylor Coastal Water and Sewer District.

The WWTF AADF has remained well below the permitted treatment capacity of 80,000 gpd. A period of heavy rain in July 2021 resulted in extremely high flows to the WWTF. Even with this surge of flow, the AADF to the WWTF remained well below the plant permitted capacity.

Utilities are Capital Intensive.

The water supply and wastewater treatment industry are very capital intensive because almost every component of these systems requires fixed capital investments in long-term infrastructure. Water facilities include water supply, treatment, storage, distribution, and disposal of treatment residuals. Wastewater facilities include sewage collection, pumping (lift stations), transmission, treatment, disposal of treated effluent, and disposal of sludge.

Funding Utilities.

Utilities typically operate for many years without fully recovering the initial construction costs. Loans and grants supported by rates are used to finance capital facilities. In addition to paying the debt obligation for existing facilities, rates support operation, maintenance, salaries, chemicals, power, vehicles, equipment, repair and replacement. Rates frequently cannot be structured to accommodate new or expanded facilities for new customers. So, Impact Fees are used to assess new customers for capital construction costs and allow new customers to "buy-in" to the system. Impact Fees bridge the funding gap needed to build the new facilities to provide service to new residents and businesses. Impact Fees cannot be used for operation, maintenance, repair, replacement, or normal utility administrative costs. Impact Fees should be held in a separate account from water/wastewater revenue and general funds.

It is just too easy to neglect existing facilities and run them into the ground instead of being proactive in their repair and replacement. Problems with this approach are:

- 1. Cost for replacement is several times greater than for repair and maintenance;
- 2. Real cost of utility operation is hidden from the ratepayer and governing board;
- 3. Assets are not properly valued and preserved;

- 4. Improper stewardship of public assets;
- 5. Grants never cover all replacement costs; and
- 6. Diversion of public funds from more worthy uses.

FRWA Impact Fees Rules-of-Thumb.

Twenty years ago conventional lime softening plants would cost about \$4 to \$6 per gallon to construct, today you would expect to spend approximately \$9 to \$13 per gallon to construct. Actual costs vary greatly by community, by region, and between design consultants. Plus, any estimate must include unique site-specific needs like new raw water wells, piping, land, instrumentation & controls, emergency power generation, or deep wells. Taylor Coastal Water and Sewer District has a Category V Disinfection Only system which has an estimated construction cost of approximately \$5.66 per gallon for the plant size.

Costs of New Wastewater Treatment Capacity.

Establishing the cost for new wastewater treatment capacity is just as difficult for wastewater treatment plants. Rules-of-thumb to help you estimate Impact Fees for wastewater plants are provided, but do not include collection systems, lift stations, force mains, land acquisition, offices, SCADA, controls, emergency power generation, sprayfields, percolations ponds, or deep wells for disposal.

Twenty years ago, conventional extended aeration secondary treatment plant would cost about \$3 to \$5 per gallon to construct, today you would expect to spend approximately \$20 per gallon to construct. Actual costs vary greatly by community, by region, and between design consultants. Estimates for the Modified Ludzack-Ettinger wastewater treatment facility and effluent spray irrigation system used by the District are approximately \$20/gallon.

Scheduling Presentation of Impact Fees Study Findings and Recommendations.

We are happy to come to your next utility commission meeting to explain our analysis and report. We anticipate that you will have questions to discuss and options to consider. Our presentation is between 20 to 30-minutes in length, which would be followed by commission discussion. This activity typically takes about 60 to 90-minutes and can be held during a special workshop or a normal commission meeting. This is an informative meeting and decisions about Impact Fees are usually taken at subsequent meetings. It is important that all commission members be in attendance since the adoption of Impact Fees increases can produce public comment.

We have enjoyed serving you and wish your water and wastewater system the best. Please feel free to contact us if you have any further questions.

Sincerely,

Sterling L. Carroll, P.E. FRWA State Engineer

David Bolam, P.E. Saltus Engineering, Inc.

Abbreviations, Terms and Acronyms

A complete glossary of environmental / financial terms can be found on the EPA website by an internet search.

Abbr	Description
ACP	Asbestos-Cement Pipe (transite)
ADD	Average Daily Demand - defined as the water system's average water demand for a single calendar day
AMP	Asset Management Plan
AWWA	American Water Works Assoicaiton
BEBR	Bureau of Economic and Business Research (at the University of Florida)
CIP	Capital Improvement Program,
CIP	Cast Iron Pipe
CWS	Community Water System - a PWS that supplies water to the same population year-round
DBP	Disinfectant By-Products
DIP	Ductile Iron Pipe
DWSRF	Drinking Water State Revolving Fund Program
Divolit	Equivalent Residential Water Connection - based solely on flow. For instance 1 ERC = 250 gpd
ERC	Average Daily Demand (Residential Usage) or 0.174 gpm. A commercial entity with 750 gpd ADD would be 3.0 ERCs.
ERP	
ERP	Emergency Response Plan
ES	Equalization Storage - projection of finished-water storage needed for operational equalization
	typically 25% of maximum-day water demand
EST	Elevated Storage Tank
F.A.C.	Florida Administrative Code
FDEP	Florida Department Of Environmental Protection
FRWA	Florida Rural Water Association
FS	Fire Storage - storage needed for fire fighting for 2 or 4 hours times needed fire flow
Galv	Galvanized Steel Pipe (or GSP)
gpcd	Gallons Per Capita Per Day
gpd	Gallons Per Day
gpm	Gallons per Minute
HSP	High Service Pump
ISO	Insurance Services Office - establishes fire insurance rates for communities
MDD	Maximum Day Demand - maximum flow for any day in a month. Typically between $1.85\ to\ 2.0\ x\ ADD$ or about $500\ gpd$.
mg/L	Milligrams per liter (also parts per million)
MGD	Million Gallons per Day
BEBR	Bureau of Economic and Business Research (at the University of Florida)
MOR	Monthly Operating Report - flow records for WTP production
NFF	Needed Fire Flow - volume needed to extinguish a typical fire = NFFD x NFFR
NFFD	Needed Fire-Flow Duration - time needed to extinguish a typical fire in your community (starts at 2 hours)
NFFR	Needed Fire-Flow Rate - flow rate needed to extinguish a typical fire in your community (starts at 500
0&M	Operations and Maintenance
PER	Preliminary Engineering Report
PHD	Peak-Hour Demand - projected highest flow rate over a 24-hour period in gpm. Typically 4.0 x ADD o
psi	Pounds Per Square Inch - water system pressures range typically between 25 psi and 70 psi
PM	Preventative Maintenance
PPE	Personal Protection Equipment
PVC	Polyvinyl Chloride Pipe
FVC	
PWS	Public Water System - a system for the provision to the public of water for human consumption through pipes or other conveyances. For regulatory purposes, the system must have at least 15 service connections or serve at least 25 people daily at least 60 days a year.
R&R	Rehabilitation & Replacement,
RFI	Request for Inclusion (for the SRF)
SCADA	Supervisory Control and Data Acquisition (Telemetry)
WFWMD	Southwest Florida Water Management District
SOP	Standard Operating Procedures
SRF	State Revolving Fund
TPC	Total Permitted Capacity - the maximum allowed daily flow from a WTP as permitted by FDEP
VFDs	Variable Frequency Drives
WM	Water Meters
WTP	(Drinking) Water Treatment Plant
WUP	Water Use Permit with the local Water Management District
	Wastewater Treatment Plant
